PROTOCOL BLACK SWAN

After making a diagnosis on the condition of your epidermis,
the therapist will decide three specific and personalized things for you:
how to do exfoliation (mechanical or ultrasound),
the massage (manual or assisted by the machine)
and the combination, quantity of activators which will add
inside the cream and the mask.

Activators are concentrates of active substances
that act in a formidable way on a specific imperfection
(dehydrated skin, sensitive and reddened skin, deep wrinkles, expression lines, skin
spots, seborrheic or impure skin, etc ...).

Once the treatment is over, the therapist will prepare and give you a gift:
cream-sample with the activators chosen during the diagnosis
to extend the effects of the treatment at home.

Personal beauty is a greater recommendation than any letter of reference.
